

Practical 2

Challenges Faced

- Installing the correct version of Java and setting the JAVA_HOME environment variable.
- Downloading and extracting the Hadoop package successfully.
- Configuring Hadoop XML files (core-site.xml, hdfs-site.xml, mapred-site.xml, and yarn-site.xml) correctly.
- Setting up SSH password-less authentication.
- Starting HDFS and YARN services without configuration errors.
- Verifying Hadoop services using the jps command.
- Accessing the Hadoop web interface and resolving configuration issues.
